

## **Draft Community Rolling Action Plan (CoRAP) update for years 2025-2027**

The draft is for an annual update of the CoRAP and covers the three subsequent years 2025-2027. It contains substances suspected of posing a risk to human health or the environment. Substance evaluation is the process under REACH Regulation (EC) No 1907/2006 (Articles 44 to 48) that allows generation of information for clarification of such potential risks<sup>1</sup>.

The draft CoRAP contains 31 substances, including 13 new substances compared to the current CoRAP 2024-2026; 8 substances are being planned for evaluation in 2025, including two groups of 2 substances, 15 substances for evaluation in 2026 and 5 substances for evaluation in 2027. Three are proposed to be withdrawn.

From the 28 substances included in the CoRAP update for evaluation in 2024 – 2026 (published on 19 March 2024), 3 are proposed to be withdrawn as substance evaluation has been considered currently of low priority or unnecessary. For 1 out of these, the data obtained from compliance check or public literature are already considered sufficient to clarify the initial concerns, while for 1 substance, relevant information is requested under dossier evaluation process. This substance may be put on CoRAP again, if after the conclusion of dossier evaluation, concerns would remain beyond what can be clarified through dossier evaluation. One substance will be withdrawn due to cease of manufacture and is subject to ongoing SVHC identification as PBT.

The draft CoRAP includes the non-confidential substance names, the EC/List and CAS numbers, the initial grounds for concern and the contact details of the Member State that intends to conduct the substance evaluation.

The draft has been prepared in close cooperation with the Member States, taking into account the criteria for selection of substances<sup>2</sup>.

The draft plan has been submitted on 28 November 2024 to the Member State Competent Authorities and the ECHA Member State Committee. The Committee is expected to give its opinion on this draft CoRAP update in February 2025. On the basis of the Committee's opinion, ECHA aims to adopt and publish the CoRAP update for 2025-2027 on 25 March 2025. A justification document will accompany each substance on the CoRAP.

By publishing this draft now, ECHA wishes to inform the stakeholders of the progress made and to facilitate early communication between the involved registrants and the relevant evaluating Member State Competent Authority.

								bureau-reach(at)rivm.nl. Correspondence related to Substance evaluations should contain in the subject field the following string: "SUBSTANCE EVALUATION"

<sup>3</sup> Further concerns may be identified during substance evaluation process.

<sup>4</sup> (List No: 701-246-8; 701-463-8): due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

<sup>5</sup> (EC: 220-780-8; 265-929-8): due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

<sup>6</sup> (EC: 202-773-1; 202-826-9; 905-459-9 (previously registered as EC 246-835-6)): due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

<sup>7</sup> Previously registered as diisopropylbenzene, EC 246-835-6, CAS 25321-09-9. (EC: 202-773-1; 202-826-9; 905-459-9 (previously registered as EC 246-835-6)): due to the indication of structural similarity, these substances may potentially be addressed in a joint evaluation.

<sup>8</sup> (EC/List No: 407-000-3; 400-830-7; 400-820-2; 916-914-6; Di-substituted tert-alkyl 3- [3-(2H-benzotriazol-2-yl)-5-tert-butyl-4-hydroxyphenyl]propanoate (EC/List confidential): Group of M1 precursors to be assessed together.

<sup>9</sup> Dossier evaluation ongoing or needed, and the process to be completed before initiating substance evaluation. Substance evaluation not expected to start by 2027.

<sup>10</sup> The data are considered already sufficient to clarify the initial concerns.

<sup>11</sup> Dossier evaluation process to be completed before initiating substance evaluation. The substance may be put in CoRAP again, if after conclusion of the dossier evaluation process, concerns would remain, beyond what can be clarified through dossier evaluation.

<sup>12</sup> Cease of manufacture. The substance is subject to ongoing SVHC identification as PBT.
